Royal College
of Surgeons

ADVANCING SURGICAL CARE

Description

The Advanced Knee Ligament Instructional Course will cover a range of solutions available for treating different knee ligament injuries. Participants will hear lectures on current techniques and topics and gain valuable hands on practice in a state-of-the-art wet lab.

Over two days, the course will include lectures, discussions and hands-on cadaveric practice. There will also be an ACL tunnel placement study giving participants the opportunity to evaluate and improve their current technique.

Chairman

Dr Thomas Harlem

Consultant Orthopaedic Surgeon
Head of Center for Knee Injuries
Haralds plass Deaconal Hospital, Bergen
Norway

Faculty - Invited

TBC

Accreditation

Accredited by the Royal College of Surgeons of England.

Learning objectives

By attending this course, participants will be able to:

- Describe different treatment options available for patients with knee ligament injuries
- Demonstrate ligament reconstruction techniques
- Outline current concepts in knee repair
- Evaluate ACL tunnel placement

Participant profile

- Surgeons who routinely perform arthroscopic knee procedures including ACL reconstruction
 - Surgeons who have had some exposure to less common ligament reconstructions
 - Surgeons wanting to expand their practice into less common ligament reconstructions
 - The course will be conducted in English, so it is essential participants have a good understanding of the language
-
